

# OPEN WIDE: Citation Extended-Width Door

**S**kyWay's extended-width door modification is the perfect solution to outfit your Cessna Citation for air medical or cargo missions. It provides superb cabin access for large, bulky items without compromising the structural integrity of the Citation airframe.

Unlike clamshell-type cabin doors, there is no lower door panel to interfere with access from ramp to the cabin floor. The SkyWay door allows stretchers or cargo to be rolled up right to the cabin threshold, making it easy to load hard-to-handle items. Moreover, it utilizes the same reliable mechanical design of the original door and requires no specialized maintenance or tools.

Providing a full 36" wide opening (the original Citation door is only 23"), there's ample room for medical transport, cargo, large cameras, research equipment or other oversized items. It does not effect your existing seating arrangements, making it ideal for multiple-use aircraft — Host an in-flight business meeting one day; the next, prospect business locations using oversized camera equipment!

Engineered and built to exacting F.A.R. Part 25 standards and proven over decades, this modification is FAA approved for all Cessna Citation 500 & 560-series aircraft.

Available from Avacquire, LLC  
9236 Legado Drive  
Windermere, FL 34786  
(210) 262-4000

Available for these Cessna Citation aircraft:

- Citation 500/501SP • Citation 550/551SP
- Citation 550 Bravo • Citation 560

### SkyWay Extended-Width Door Features:

- 36 inch width (13" wider than factory stock)
- No specialized tools or maintenance required
- Swing-forward design maximizes cabin access and in-flight safety
- Meets maximum FAR 25 standards
- Installation in Uvalde, Texas by experienced crew
- Proven in dozens of installations

Pricing: \$450,000 / 50% deposit to begin parts production.

**Installation notes:** Total aircraft downtime is between 4-6 months. The aircraft is not needed on-site until all parts have been produced. All installation will be performed in Uvalde, TX by our experienced Citation crew members.

### Why not add the SkyStep to your Extended-Width Door installation?

The SkyStep cabin door step replacement offers a much safer and more robust alternative to the original factory cabin step:

- 3 equally spaced steps enhance ease of entry.
- Enclosed back & sides help prevent slips.
- A gas cylinder helps smoothly deploy the step, reducing risk of damage to door sill or toes.
- Precision machined from tough aircraft aluminum.
- Lifetime warranty.
